

Squannacook Greenways wins Wild and Scenic Rivers grant to improve canoe launch on Harbor Pond

Squannacook Greenways is pleased to announce we won a Nashua River Wild & Scenic Stewardship Council community grant to improve the canoe launch on Harbor Pond! We will be enhancing the informal dirt launch area behind Harbor Church in Townsend, MA. The base will be packed stone, and the sides will be granite blocks we unearthed during rail trail construction. We are limiting the width to ensure it is used for hand-launched boats only. With the new section of the rail trail soon to be opened, Harbor Pond will be an even better place to explore on land or on water!

Funding is provided by the Nashua, Squannacook, and Nissitissit Rivers Wild & Scenic Stewardship Council through the National Park Service under CFDA: 15.962 – National Wild and Scenic Rivers System.

Construction is nearing completion on the 0.7 mile section of the Squannacook River Rail Trail from Old Meetinghouse Road to Harbor Church in Townsend. Stay tuned for the opening date announcement!
