

# Protect the Squannacook River Rail Trail for generations with your donation!

The Community Foundation of North Central Massachusetts and Squannacook Greenways are teaming up to create an endowment to support the trail forever

Have you enjoyed a peaceful stroll or ride down the Squannacook River Rail Trail? You can help make sure generations to come of local residents can share the same experience! The Squannacook River Rail Trail will be completed in spring 2024, but there is more to be done. This rail trail is maintained by the local non-profit Squannacook Greenways, with an annual maintenance budget of \$2000 for repairs and required insurance. We are seeking to cover these costs with a permanent endowment of \$40,000.

We have teamed up with the Community Foundation of North Central Massachusetts to create this endowment, but we need your help! If you click the donate button below, you can help with either a monthly or a one-time donation. For a donation of only \$25/month for four years, you can single-handedly get us to 1/40th of our goal! The donate button lets you specify a donation start and end date, so you can control exactly what you want to give.

We look forward to a really big celebration in Spring 2024!

[Donate to support the trail!](#)

The Squannacook River Rail is treasured by residents of all ages.

Is this really the end of construction?

None of the rest of the Greenville line is permitted yet, and permitting can be more challenging than construction. We are considering extensions both to the south, toward Ayer, and to the north, toward New Hampshire. But there are challenges in both directions. So stay tuned!
